Nine Percent (Chinese: 百分之九; commonly stylized in all-caps) was a nine-member Chinese boy group formed by the survival show Idol Producer by iQIYI on April 6, 2018. The group promoted for 18 months since formation.

Nine Percent was one of the most popular boy groups in 2018. Their fans are estimated to have generated 20 million RMB of Idol Producer's revenue, with their debut album To The Nines earning more than 10 million RMB in domestic sales.

15 Percent Pledge

The 15 Percent Pledge is a US-based non-profit organization that encourages retailers to pledge at least 15 percent of their shelf-space to Black-owned

The 15 Percent Pledge is a US-based non-profit organization that encourages retailers to pledge at least 15 percent of their shelf-space to Black-owned businesses. The foundation conducts audits, shares its database of Black-owned businesses, and offers business development strategies to participating companies. It was established in 2020 by Aurora James after she created the 15 Percent Pledge initiative on Instagram, following the murder of George Floyd.

Percentage

In mathematics, a percentage, percent, or per cent (from Latin per centum 'by a hundred' by a hundred) is a number or ratio expressed as a fraction of 100. It is often

In mathematics, a percentage, percent, or per cent (from Latin per centum 'by a hundred') is a number or ratio expressed as a fraction of 100. It is often denoted using the percent sign (%), although the abbreviations pct., pct, and sometimes pc are also used. A percentage is a dimensionless number (pure number), primarily used for expressing proportions, but percent is nonetheless a unit of measurement in its orthography and usage.

Percent (album)

Percent is the second Korean-language studio album by South Korean singer Onew. It was released on July 15, 2025, through Griffin Entertainment. The album

Percent is the second Korean-language studio album by South Korean singer Onew. It was released on July 15, 2025, through Griffin Entertainment. The album contains eleven songs, including singles "Mad", "Confidence" and "Animals". It peaked at number four on South Korea's Circle Album Chart.

Five-Percent Nation

The Five-Percent Nation, sometimes referred to as the Nation of Gods and Earths (NGE/NOGE) or the Five Percenters, is a cultural movement founded in 1964

The Five-Percent Nation, sometimes referred to as the Nation of Gods and Earths (NGE/NOGE) or the Five Percenters, is a cultural movement founded in 1964 in the Harlem section of the borough of Manhattan, New

York City, by Clarence 13X, who was previously known as Clarence Edward Smith.

Members of the group call themselves Allah's Five Percenters, which reflects the concept that ten percent of the people in the world are elites and their agents, who know the truth of existence and opt to keep eighty-five percent of the world in ignorance and under their controlling thumb; the remaining five percent are those who know the truth and are determined to enlighten the eighty-five percent.

The Nation of Gods and Earths teaches the belief that Black people are the original people of the planet Earth and are therefore the fathers ("Gods") and mothers ("Earths") of civilization. The Nation teaches that Supreme Mathematics and Supreme Alphabet, a set of principles created by Allah the Father, is the key to understanding humankind's relationship to the universe. The Nation teaches that the black man, insofar as the Nation defines this race, is himself God, with the black race being a race of actual gods.

Software as a service

make up the plurality, 43 percent, of the cloud computing market while IaaS and PaaS combined account for approximately 25 percent. In the 1960s, multitasking

Software as a service (SaaS) is a cloud computing service model where the provider offers use of application software to a client and manages all needed physical and software resources. SaaS is usually accessed via a web application. Unlike other software delivery models, it separates "the possession and ownership of software from its use". SaaS use began around 2000, and by 2023 was the main form of software application deployment.

Unlike most self-hosted software products, only one version of the software exists and only one operating system and configuration is supported. SaaS products typically run on rented infrastructure as a service (IaaS) or platform as a service (PaaS) systems including hardware and sometimes operating systems and middleware, to accommodate rapid increases in usage while providing instant and continuous availability to customers. SaaS customers have the abstraction of limitless computing resources, while economy of scale drives down the cost. SaaS architectures are typically multi-tenant; usually they share resources between clients for efficiency, but sometimes they offer a siloed environment for an additional fee. Common SaaS revenue models include freemium, subscription, and usage-based fees. Unlike traditional software, it is rarely possible to buy a perpetual license for a certain version of the software.

There are no specific software development practices that distinguish SaaS from other application development, although there is often a focus on frequent testing and releases.

Health spending as percent of gross domestic product (GDP) by country

total expenditure on health as a percent of national gross domestic product (GDP). GDP is a measure of the total economy of a nation. Total expenditure

This article includes 2 lists of countries of the world and their total expenditure on health as a percent of national gross domestic product (GDP). GDP is a measure of the total economy of a nation. Total expenditure includes both public and private health expenditures. See also: List of countries by total health expenditure per capita.

The first table lists member countries of the Organisation for Economic Co-operation and Development (OECD).

The next table lists nearly all countries. It uses data from the World Health Organization (WHO).

Income tax in India

instead of as a lump sum. The schedule of advance tax payment for individual and corporate taxpayers are: On or before 15 June – 15 percent of advance

Income tax in India is governed by Entry 82 of the Union List of the Seventh Schedule to the Constitution of India, empowering the central government to tax non-agricultural income; agricultural income is defined in Section 10(1) of the Income-tax Act, 1961. The income-tax law consists of the 1961 act, Income Tax Rules 1962, Notifications and Circulars issued by the Central Board of Direct Taxes (CBDT), annual Finance Acts, and judicial pronouncements by the Supreme and high courts of India.

The government taxes certain income of individuals, Hindu Undivided Families (HUF's), companies, firms, LLPs, associations, bodies, local authorities and any other juridical person. Personal tax depends on residential status. The CBDT administers the Income Tax Department, which is part of the Ministry of Finance's Department of Revenue. Income tax is a key source of government funding.

The Income Tax Department is the central government's largest revenue generator; the total tax revenue increased from ₹1,392.26 billion (US\$16 billion) in 1997–98 to ₹5,889.09 billion (US\$70 billion) in 2007–08. In 2018–19, direct tax collection reported by the CBDT was about ₹11.17 lakh crore (₹11.17 trillion).

Demographics of New Zealand

minority (16.5 percent), followed by Asians (15.3 percent), and non-Māori Pacific Islanders known collectively as Pasifika (9.0 percent). This is reflected

The demographics of New Zealand encompass the gender, ethnic, religious, geographic, and economic backgrounds of the 5.3 million people living in New Zealand. New Zealanders predominantly live in urban areas on the North Island. The five largest cities are Auckland, Wellington, Christchurch, Hamilton, and Tauranga. Few New Zealanders live on New Zealand's smaller islands. Waiheke Island (near Auckland) is easily the most populated smaller island with 9,400 residents, while Great Barrier Island, the Chatham and Pitt Islands, and Stewart Island each have populations below 1,000. New Zealand is part of a realm and most people born in the realm's external territories of Tokelau, the Ross Dependency, the Cook Islands and Niue are entitled to New Zealand passports.

As of the 2018 census, the majority of New Zealand's population is of European descent (70 percent; often referred to as Pākehā), with the indigenous Māori being the largest minority (16.5 percent), followed by Asians (15.3 percent), and non-Māori Pacific Islanders known collectively as Pasifika (9.0 percent). This is reflected in immigration, with most new migrants coming from Britain and Ireland, although the numbers from Asia in particular are increasing. Auckland is the most ethnically diverse region in New Zealand with 53.5 percent identifying as Europeans, 28.2 percent as Asian, 11.5 percent as Māori, 15.5 percent as Pasifika, and 2.3 percent as Middle Eastern, Latin American or African (MELAA). New Zealand is considered by some to be unique among Western countries for its high levels of ethnic intermarriage, which has historically been viewed with tolerance. According to a 2006 study, Māori have on average roughly 43% European ancestry, although the notion of being "mixed-race" is uncommon.

English, Māori, and New Zealand Sign Language are the official languages, with English being predominant and understood by the vast majority of Māori speakers. Significant minorities speak Chinese, Samoan, Hindi, French, and Tagalog. New Zealand English is mostly non-rhotic, but has distinct rhotic dialects as well. Rhoticity is widespread among Pasifika and Māori and is becoming increasingly common across the upper North Island. The closest English dialect to non-rhotic New Zealand English is Australian English, but they have several key distinctions, such as the New Zealand centralisation of the short i. The Māori language has undergone a process of revitalisation and is spoken by 4 percent of the population. New Zealand has an adult literacy rate of 99 percent and over half of the population aged 15–29 hold a tertiary qualification. In the adult population 14.2 percent have a bachelor's degree or higher, 30.4 percent have some form of secondary

qualification as their highest qualification and 22.4 percent have no formal qualification. As at the 2018 census, 37 percent of the population identify as Christians, with Hinduism and Buddhism being the largest minority religions; almost half of the population (48.5 percent) is irreligious.

English language

least 70 percent of total native speakers of the Germanic languages, and Ethnologue estimated that there were over 1.4 billion speakers worldwide as of 2021[update]

English is a West Germanic language that emerged in early medieval England and has since become a global lingua franca. The namesake of the language is the Angles, one of the Germanic peoples that migrated to Britain after its Roman occupiers left. English is the most spoken language in the world, primarily due to the global influences of the former British Empire (succeeded by the Commonwealth of Nations) and the United States. It is the most widely learned second language in the world, with more second-language speakers than native speakers. However, English is only the third-most spoken native language, after Mandarin Chinese and Spanish.

English is either the official language, or one of the official languages, in 57 sovereign states and 30 dependent territories, making it the most geographically widespread language in the world. In the United Kingdom, the United States, Australia, and New Zealand, it is the dominant language for historical reasons without being explicitly defined by law. It is a co-official language of the United Nations, the European Union, and many other international and regional organisations. It has also become the de facto lingua franca of diplomacy, science, technology, international trade, logistics, tourism, aviation, entertainment, and the Internet. English accounts for at least 70 percent of total native speakers of the Germanic languages, and Ethnologue estimated that there were over 1.4 billion speakers worldwide as of 2021.

Old English emerged from a group of West Germanic dialects spoken by the Anglo-Saxons. Late Old English borrowed some grammar and core vocabulary from Old Norse, a North Germanic language. Then, Middle English borrowed vocabulary extensively from French dialects, which are the source of approximately 28 percent of Modern English words, and from Latin, which is the source of an additional 28 percent. While Latin and the Romance languages are thus the source for a majority of its lexicon taken as a whole, English grammar and phonology retain a family resemblance with the Germanic languages, and most of its basic everyday vocabulary remains Germanic in origin. English exists on a dialect continuum with Scots; it is next-most closely related to Low Saxon and Frisian.
